

# Film Production

**FILM PRODUCTION** is the process of making a film. All filming, screenwriting, directing, and editing must be done by the student producer. All entries must be original student produced footage. The student must be in control of the camera at all times, including when using a tripod, selfie stick, drone, or other film capturing devices. Entries created using presentation software such as PowerPoint and Google Slides are prohibited.

***See Film Production FAQ on next page for more information.***

Consider the following styles to portray your original work of fiction or nonfiction:

- Animation: Demonstrates motion by sequencing still objects or using student created computer graphics (Not AI).
- Narrative: Tells a fictional story developed by the student.
- Documentary: Presents facts and information.
- Experimental: Explores movement, light, and montage.
- Multimedia: Uses a combination of different contents (text, audio, still images, animation, etc.).

An explanation of the storyline and/or the significance of the film style might be a useful addition to the artist statement. Whether an entry displays use of technologies or a simple approach, it will be judged primarily on how well the student uses his or her artistic vision to portray the theme, originality, and creativity.

Software can be used to develop, enhance and/or present an entry but may not provide the primary design and/or concept. Entrants must provide a brief description of the tools and method used in the creation process.

Copyright. Plagiarized entries will be disqualified. Use of copyrighted material, including any copyrighted cartoon characters, material downloaded from the internet, copyrighted recorded music or copyrighted photographs or stock images, is not acceptable, except for the following:

- If background music is used in film production entries, it must be cited on the entry form (title, composer and performer).
- Entries may include public places, well-known products, trademarks or certain other copyrighted material as long as that copyrighted material is incidental to the subject matter of the piece and/or is a smaller element of a whole. The resulting work cannot try to establish an association between the student and the trademark/business/material, or influence the purchase/non-purchase of the trademarked good.
- Entries should primarily be the student's original production, including the design process, original footage and/or student-created content. Any copyrighted media should be used sparingly to create a completely new and different work of art and only used to emphasize the purpose/goal of the student's production and original content .

## Suggestions for Audio/Visual Quality:

- Use a tripod to hold the camera still.
- Make sure there is plenty of lighting, especially if shooting indoors.
- Turn off all noise-making devices in the room (air conditioners, fans, telephones, etc.).
- Record a short test and listen to it. If needed, change the record volume or microphone location.
- Make sure the background music (if any) is audible on the recording.
- Allow for two seconds of silence at the beginning and end of your recording.

## Submission Requirements:

- Only new pieces of artwork inspired by the theme may be submitted.
- Each entry must be the original work of one student only.
- Student submitting the entry **MUST** be the cameraman.
- Video must not exceed 5 minutes in length and 1GB (one gigabyte) in file size.
- **Accepted file formats include MP4, MOV, AVI, WMV, and MKV.**
- Use of background music must be cited on the Student Entry Form.

## How to Submit:

- All entries must be submitted online at [www.utahpta.org/ref](http://www.utahpta.org/ref). All judging will be conducted online.

## Frequently Asked Questions

**Can I use video clips I find on the internet or clips that are shared with me by the news or a business?  
Can I use short video clips that my grandma, friend, teacher, neighbor, or someone else filmed and shared with me? Can I use photographs taken by other people?**

Entries may include copyrighted works, such as photographs, magazine or digital media clippings and/or type cut out of a newspaper, as long as those portions of copyrighted works are used **sparingly** to create a completely new and different work of art and only used to emphasize the purpose/goal of the student's production and original content.

**If I use a tripod, can my mom or dad or somebody else turn the camera on and off for me?**

No.

**Can someone teach me how to use editing software?**

Yes. It's fine for someone to teach you how to edit films. However, they should teach you using material that will not be part of your Reflections entry. All editing work for your entry must be done by you.

**Can I make a slideshow?**

Films that have a slideshow format are discouraged. You may not use presentation software. A film production entry should also not appear to be made using presentation software. It should include video and sound elements. Still photos may be used, but should not be the primary focus of your entry. Keep in mind that a film should consist of more than a show and tell of photographs.

**Do I have to be in my film?**

No. Using other people in your film is a great way to make the filming process easier, since you are required to be in control of the camera without help from others.

**I want to appear in my film. How do I do that without breaking the rules?**

You may use a tripod, selfie-stick, drone, or other film capturing equipment. You still must be the person to turn the camera on and off. Other people may not hold the camera. Feel free to be creative, but be prepared to explain your process on the entry form.

**Is AI art allowed?**

No. All entries must be the original work of one student only. We will not accept entries created using Artificial Intelligence programs.

Tips by Savanna Navarro

National Award of Excellence Winner from Utah

- Start by brainstorming ideas using the theme. Try to incorporate the theme in creative ways that are inspiring to you.
- Make a storyboard/plan out shots you want to get and write your script so that you know from the start where the scene(s) will go, where you'll need to film, and when you need which actors.
- Learn how to use your camera and the different features on it.
- Search online for free editing software. Using an editing software is VERY important if you want a professional looking final product!!
- Play around with your video editing software to know what it does before you plan your storyboard. It will help you know what kinds of shots and transitions you can do.
- If you're filming outside, use a separate recorder for the vocal audio. I use the microphone app on my phone or a hand-held recorder for the audio for a cleaner sound, then I add that using the video software.
- Communicate to your actors before you begin shooting so they understand your vision.
- Get a lot of B-roll (cool and creative shots that you can mix into your main story to keep things interesting).
- Sometimes you have to use a tripod and be your own actor and that's fine. Just remember that it limits the movement in your shots if they're all filmed with a tripod, so you'll want to find ways to get more interesting shots to add in there to mix things up. You can also change the angle and height of the tripod to help with that.
- Search online for royalty-free music and sound effects. There's a lot of really great stuff out there that will make your film better! Just be sure to cite them on your entry form and in credits (if you make credits).
- And most of all, have FUN! Express yourself, and be proud of your work! Filmmaking is a great way to share what inspires you with the world!
