

Objectives

- Help make your school a more welcoming place for families.
- Empower families to become advocates as part of the school decision-making process.
- Demonstrate to school leaders that PTA is a key partner for continuous school improvements.
- Receive recognition in your community, at the state level and nationwide for engaging families in a way that makes a substantial, positive impact on your school and student success

What it Takes

We send out a survey by November.

We meet with the principal afterwards to discuss where we can make the biggest difference.

We pick one focus area to work on for the year.

We send out a second survey towards the end of the year.

We are looking for help from parents that represent our school's diversity.

We also need diversity of thought and experience to help choose a project to improve our school.
